## PROFESSIONAL EXPERIENCE

### CARTA:

Tempe, AZ

Finance and Equity Analyst

August 2024 – May 2025

- Support finance and equity-related analysis for private market clients, building stronger understanding of how startups manage fundraising, ownership, and employee equity
- Use AI tools and internal workflow automation to improve research, documentation, analysis, and recurring finance processes across day-to-day equity workflows
- Gain exposure to the private company ecosystem through work connected to equity, ownership, valuations, cap tables, and startup financial operations
- Create internal bots to automate repetitive tasks, reduce manual work, improve turnaround time, and support more consistent team execution

### ASU:

Tampa, FL

Venture Capital Analyst

June 2024 – August 2024

- Spearheaded due diligence on 10+ early-stage technology and AI startups using PitchBook, synthesizing market signals and financial models into 3 finalist investment pitches for VC partners
- Conducted TAM/SAM/SOM market sizing and comparable company analysis using revenue multiples, producing structured memos that supported investment committee decisions on capital deployment
- Built scenario-based Excel models forecasting IRR, exit multiples, and revenue sensitivities, translating complex financial assumptions into clear investment recommendations

### L'Oréal:

Tempe, AZ

Finance Intern

August 2023 – May 2024

- Streamlined invoice processing workflow by identifying bottlenecks and implementing automation, reducing processing time by 30% and improving vendor responsiveness
- Performed account reconciliations, resolved vendor account discrepancies, and supported audit preparation to ensure accurate ledger balances and consistent finance operations

## EDUCATION

Arizona State University – W.P. Carey School of Business

Tempe, AZ

B.S. in Finance and Computer Information Systems | GPA: 3.80

## SOFTWARE PROJECTS

### Sports Betting Reverse Line Movement Tracker

2025

- Built a Python daemon that polls live sports odds every 15 minutes via The Odds API, detects reverse line movement signals across all US sports, stores flagged events in a SQLite database, and surfaces a CLI alert system — deployed to a cloud server running continuously via systemd
- Architected the full data pipeline: API ingestion, deduplication, signal detection algorithms, and structured storage, demonstrating end-to-end engineering and quantitative problem-solving

### Automated Finance Job Search Intelligence Tool

2025

- Built a Python-based job monitoring system that aggregates entry-level finance and venture capital postings from multiple public job boards, deduplicates listings using SQLite, and delivers a formatted daily email digest
- Architected the full workflow using Claude Code, including data ingestion, database management, duplicate detection, email automation, and scheduled execution, demonstrating hands-on experience with AI-assisted software development

### Quantitative Momentum Trading Engine

2025

- Developed and backtested a quantitative momentum-based trading strategy using Python, analyzing historical price data and signal logic to evaluate risk-adjusted returns across market conditions
- Built a modular codebase with configurable parameters for signal thresholds, position sizing, and performance metrics including Sharpe ratio, max drawdown, and cumulative P&L visualization

## TECHNICAL SKILLS & INTERESTS

**Certifications:** PE & VC by Università Bocconi; DCF Modeling by Coursera; Claude 101, Claude Code in Action, Intro to Claude Cowork, Intro to Agent Skills by Anthropic

**Tools:** Tableau, Microsoft Office, Adobe Creative Suite, Google Suite, Power BI, Workday, SAP, PitchBook

**Programming Languages:** SQL, Python, Java, JavaScript, HTML

**Soft Skills:** Adaptability, Effective Communication, Collaborative, Public Speaking, Time Management, Analytical Thinking

**Interests:** Intramural Sports (Basketball, Football, Softball), Sports Analytics & Fantasy Leagues, Traveling
